

Amazon EVS: Take flight with VMware on AWS

Accelerate your VCF migration with EVS Runway by Xtravirt

Amazon Elastic VMware Service (EVS)

Amazon EVS runs VMware Cloud Foundation (VCF) directly within your Amazon Virtual Private Cloud (VPC). Whether you chose to self-manage EVS, or work in partnership with an approved partner like Xtravirt, you can experience the scale, resilience, and performance of AWS while keeping your familiar VCF software and skills.

Why Amazon EVS?

Customers choose Amazon EVS to leverage cloud capabilities for scale & sustainability, while benefiting from:

Retained control

Keep complete control of your VMware architecture by owning and operating your VCF environment on public cloud

Reduced Friction

Subscription portability and automated deployment of VCF remove migration friction for consistent operational efficiency

Relocate or extend at pace

Simplify and accelerate the relocation or extension of VMware workloads without the need to re-platform or re-factor.

Rich AWS Services

Seamlessly extend and expand your VMware environment with the richest set of native hyperscaler services

Extend or relocate VMware workloads to meet urgent business needs

Meet time critical deadlines for data centre exit, or hardware refresh

Overcome skills and resourcing challenges

Bring high performance compute to critical workloads

Assure business continuity and disaster recovery

Seamlessly integrate virtual & modern applications with AWS native services

Adopt AWS services at your own pace

Take advantage of AI capabilities

Achieve agility and scalability

Meet sustainability targets

Bring VMware workloads to Amazon EVS with

1. PRE-FLIGHT CHECKS READINESS

Amazon EVS
Readiness Assessment

2. FLIGHT PLAN MIGRATION ASSESSMENT

TCO &
Licensing

3. TAKE-OFF MIGRATE

Xtravirt Managed
Services

Introducing EVS Runway by Xtravirt

Working in partnership with AWS, Xtravirt has developed EVS Runway, a portfolio of services built on proven migration methodologies specifically designed to simplify and fast-track the migration of VMware workloads to Amazon EVS.

Through a simple 4-step approach, customers can realise the promise of VCF Anywhere. Xtravirt is an official Amazon EVS launch partner and brings unparalleled VMware expertise to your journey.

EVS Runway accelerates value realisation

Extend your VMware estate to AWS, your fastest path with no retraining, no replatforming, and no disruption to your services.

Take full advantage from the workloads and data within VMware stack, adjacent to your existing AWS footprint, and leverage the 250+ services within AWS.

For VMware workload migrations think EVS Runway by Xtravirt

- ◆ Expert-led consulting for data centre and cloud (since 2007)
- ◆ Unparalleled VMware Cloud Foundation (VCF) expertise
- ◆ Official Amazon EVS Launch Partner
- ◆ Tried and trusted migration methodologies

Why Xtravirt?

Xtravirt are the trusted partners for AWS and Broadcom, delivering unrivalled professional & managed services for private cloud.

To maximise success, engage us early!

Meeting your unique business needs faster

The core value of EVS Runway is acceleration. If traditional migrations feel like moving your environment piece-by-piece, EVS Runway is the specialised, high-speed relocation service. It uses the right tools, expert skills and methodology to move your existing VCF environment quickly and without disruption to a new, optimised platform, Amazon EVS. This ensures your environment operates smoothly during relocation while also giving it access to a vast array of AWS Native Services.

Xtravirt's industry leading skills at delivering VMware Cloud Foundation alongside the proven relocation framework in EVS Runway ensure a seamless journey to AWS regardless of your starting point. Our consulting-led approach ensures that your business strategy and unique requirements are taken into account while our managed services optimise performance and increase resilience enabling your organisation to unlock full value from Amazon EVS.

1. PRE-FLIGHT CHECKS READINESS

Amazon EVS
Readiness Assessment

Unblock stalled or non-starting VMware migrations to AWS.

- Gain insight of organisational and technical readiness
- Determine your current state and readiness for the next step of the VCF journey.
- Receive a consolidated Readiness Assessment report with actionable outputs to inform your strategy.
- Deliverables include high-level sizing, pricing for potential EVS architecture, and key roadmap milestones.

2. FLIGHT PLAN ASSESS

Migration assessment for VMware to AWS

Validate optimal routes to Amazon EVS for best business value

- An Optimised Licensing Assessment to fully understand benefits and TCO to AWS EVS
- Generate an assessment analytics report and a business case presentation delivered to key stakeholders
- Provide a runway to success on AWS EVS, including a roadmap and potential timelines.

3. TAKE-OFF MIGRATE

Expert-led Amazon EVS Migration

Accelerated VCF migrations for faster Time to Value (TTV)

- Relocate or extend VMware workloads with a customised Landing Zone and complementary AWS services.
- Build your extended VCF footprint on Amazon EVS to ensure best practices and successful transition
- Receive support for migration waves, cut-over plans, rollback planning, testing, and post-migration hypercare.
- Accelerate business outcomes with zero downtime and minimal disruption.

4. AUTO PILOT MANAGE

Xtravirt Managed Services

Expert management at every layer of the stack fulfilled by VCF experts.

- Offset your operational capabilities to focus your resources on future-proofing your business needs.
- Ensure full operational coverage for your extended VCF environment using leading VCF skills.
- Optimise performance, increase resilience, and drive early adoption to increase stakeholder confidence.
- Services work as an extension of your internal team with 24/7 coverage from a UK-based team.

UNLOCK ONWARD MODERNISATION

- Managed Databases
- Analytics
- Containers
- Serverless
- Generative AI
